The History of Inalix

PT. INALIX was established on March 6th, 2001. With the spirits for developing Indonesian Information Technology (IT) and optimizing the knowledge management mechanism, Inalix is intended to create a technology-minded people for the nation.

Based on our project curriculums, we have supplied various Airport-IT-products to several airports in Indonesia. Our first success project began in Batam Hang Nadim Airport in 2001, where we were assigned to migrate the existing FIDS (Flight Information Display System) to our new product of FIDS, namely INALIX-FIDS. After a while, we had another assignment in Balikpapan Sepinggan Airport, where we also had to migrate the existing FIDS to Inalix FIDS.

Since then PT. Inalix has been committed to seriously entering the nationwide IT business by focusing in developing systems and delivering services for Airport-IT needs.

INALIX-FIDS uses Linux Operating System that is stable, reliable and low cost system supported by generic hardware became more acknowledged and accepted by our prime customer, PT. Angkasa Pura I (Persero) as well as PT. Angkasa Pura II (Persero). And as the time went on, more INALIX FIDS has been implemented in other airports in Indonesia such as Sepinggan International Airport – Balikpapan, Adi Sutjipto Airport – Yogyakarta, Polonia International Airport – Medan and Tabing Airport – Padang (the last two airports are managed by PT.(Persero) Angkasa Pura II).

As the company grows, more software applications and systems have been implemented. Using Linux as our major specialty, we have developed products such as ID-Card System (implemented in Airports of Ngurah Rai-Denpasar, Sam Ratulangi-Menado, Hasanuddin-Makassar and others) and Automatic Announcement System (implemented in Medan Polonia International Airport).

These successful implementation and the increasing demands from the customers motivate PT. Inalix to become a company that continuously delivering its best products, as well as giving its highest IT-qualified services that vary from consulting and customizing software development and implementation, to constructing and maintaining computer networks and infrastructure component such as PCs, Proxy Server, Mail Server, Web Server and Firewall System.

As a young and flexible enterprise we rely on quality management and processes designed and developed according to current knowledge. Thus, our customers can demand maximum of efficiency, quality and protection of investment.
In the future Inalix as a fully-nation-owned Company will keep its core principles and implement projects of various sizes quickly and efficiently, as customer satisfaction is our highest priority.

We commited to deliver the best Airport Information technologies.

The History of Inalix

PT. INALIX didirikan pada tanggal 6 Maret 2001. Dengan semangat untuk mengembangkan Teknologi Informasi (TI) Indonesia dan mengoptimalkan mekanisme manajemen pengetahuan, Inalix diharapkan dapat menciptakan insan yang berwawasan teknologi bagi bangsa.

Berdasarkan kurikulum proyek kami, kami telah memasok berbagai produk IT-Bandara ke beberapa bandara di Indonesia. Proyek sukses pertama kami dimulai di Bandara Hang Nadim Batam pada tahun 2001, di mana kami ditugaskan untuk memigrasikan FIDS (Flight Information Display System) yang ada ke produk baru FIDS kami, yaitu INALIX-FIDS. Setelah beberapa saat, kami mendapat tugas lagi di Bandara Sepinggan Balikpapan, di mana kami juga harus memigrasikan FIDS yang ada ke Inalix FIDS.

Sejak saat itu PT. Inalix telah berkomitmen untuk serius memasuki bisnis IT nasional dengan fokus pada pengembangan sistem dan memberikan layanan untuk kebutuhan Airport-IT.

INALIX-FIDS menggunakan Sistem Operasi Linux yang stabil, handal dan sistem biaya rendah didukung oleh perangkat keras generik menjadi lebih diakui dan diterima oleh pelanggan utama kami, PT. Angkasa Pura I (Persero) serta PT. Angkasa Pura II (Persero). Dan seiring berjalannya waktu, semakin banyak INALIX FIDS yang diterapkan di bandara lain di Indonesia seperti Bandara Internasional Sepinggan – Balikpapan, Bandara Adi Sutjipto – Yogyakarta, Bandara Internasional Polonia – Medan dan Bandara Tabing – Padang (dua bandara terakhir dikelola oleh PT.(Persero) Angkasa Pura II).

Seiring pertumbuhan perusahaan, lebih banyak aplikasi dan sistem perangkat lunak telah diimplementasikan. Menggunakan Linux sebagai spesialisasi utama kami, kami telah mengembangkan produk seperti Sistem ID-Card (diimplementasikan di Bandara Ngurah Rai-Denpasar, Sam Ratulangi-Menado, Hasanuddin-Makassar dan lain-lain) dan Sistem Pengumuman Otomatis (diimplementasikan di Bandara Internasional Polonia Medan) .

Implementasi yang sukses ini dan meningkatnya permintaan dari pelanggan memotivasi PT. Inalix untuk menjadi perusahaan yang terus memberikan produk terbaiknya, serta memberikan layanan berkualitas TI tertinggi yang bervariasi dari konsultasi dan penyesuaian pengembangan dan implementasi perangkat lunak, hingga membangun dan memelihara jaringan komputer dan komponen infrastruktur seperti PC, Server Proxy, Mail Server, Server Web, dan Sistem Firewall.

Sebagai perusahaan muda dan fleksibel, kami mengandalkan manajemen kualitas dan proses yang dirancang dan dikembangkan sesuai dengan pengetahuan terkini. Dengan demikian, pelanggan kami dapat menuntut efisiensi, kualitas, dan perlindungan investasi yang maksimal.
Di masa depan Inalix sebagai Perusahaan yang sepenuhnya dimiliki oleh negara akan menjaga prinsip-prinsip intinya dan melaksanakan proyek-proyek dari berbagai ukuran dengan cepat dan efisien, karena kepuasan pelanggan adalah prioritas utama kami.

Kami berkomitmen untuk memberikan teknologi Informasi Bandara terbaik.
